Phase 9

Reports & Dashboards

Objective:

- To visualize and analyze Knowledge Articles data using Salesforce reports and dashboards.

Steps & Highlights:

1. **Custom Report Type:**
    - Created a **Custom Report Type** with **Primary Object = Knowledge_Article__c**.
    - Enabled access to related objects like **Category** and **Tags** if needed.
2. **Reports Created:**
    - **Top Articles by Views:**
        - Bar chart showing articles sorted by View_Count__c.
    - **New Articles in Last 30 Days:**
        - List of recently created or published articles.
    - **Author Contributions:**
        - Report showing the number of articles contributed by each user (if articles linked to users).
3. **Dashboard Setup:**
    - Created a **Dashboard** and added tiles for each report.
    - Configured chart types, labels, and filters for better visualization.
    - Enabled easy monitoring of top-performing content and activity trends.
4. **Outcome:**
    - Provides management and users with quick insights into article popularity, recent activity, and contributor performance.
    - Helps in decision-making for content improvement and knowledge management.

Top Articles by Views

- **Purpose:** Identify the most popular Knowledge Articles based on user engagement.
- **Report Type:** Custom Report on **Knowledge_Article__c**.
- **Metric:** View_Count__c field to track article views.
- **Visualization:** Bar chart showing articles sorted in descending order of views.
- **Outcome:** Quickly highlights high-value content for users and administrators, helping prioritize updates or promote widely used articles.

 Purpose: Provide a visual overview of Knowledge Articles metrics and user engagement.

 Components / Tiles:

1. **Top Articles by Views** – Bar chart showing most viewed articles.
2. **New Articles**– Bar Chart or Donut chart of recently added articles.
3. **Author Contributions** – Pie chart or table showing articles contributed by each author.

 Interactivity: Click on a chart or tile to drill down into detailed reports.
 Outcome: Allows admins and users to monitor article popularity, recent activity, and contribution trends at a glance.
