- **Instance:** CAN96
- **Locale Formats:** ICU
- **Created By:** OrgFarm EPIC, 21 July 2025, 10:36 PM
- **Last Modified By:** Saloni Nandurkar, 28 Sept 2025, 11:24 PM

Notes

- Admin and user newsletters enabled.
- Notices about system maintenance and downtime not hidden.
- Basic setup completed for Developer Org configuration.

Permission Set – Knowledge Hub User

The *Knowledge Hub User* permission set was created to define user-level access without modifying profiles.

Overview

- **Permission Set Name:** Knowledge Hub User
- **API Name:** Knowledge_Hub_User
- **License:** – (Not assigned to a specific license)
- **Session Activation Required:** No
- **Permission Set Groups Added To:** 0

- **Created By:** Saloni Nandurkar, 14 Sept 2025, 1:10 PM
- **Last Modified By:** Saloni Nandurkar, 28 Sept 2025, 12:38 PM

Assigned Access Areas

- **Apps** – Visibility for Salesforce apps and custom Lightning apps.
- **Assigned Apps** – Control over which apps appear in the app menu.
- **Assigned Connected Apps** – Define visibility of connected apps in the app menu.

Object & Data Permissions

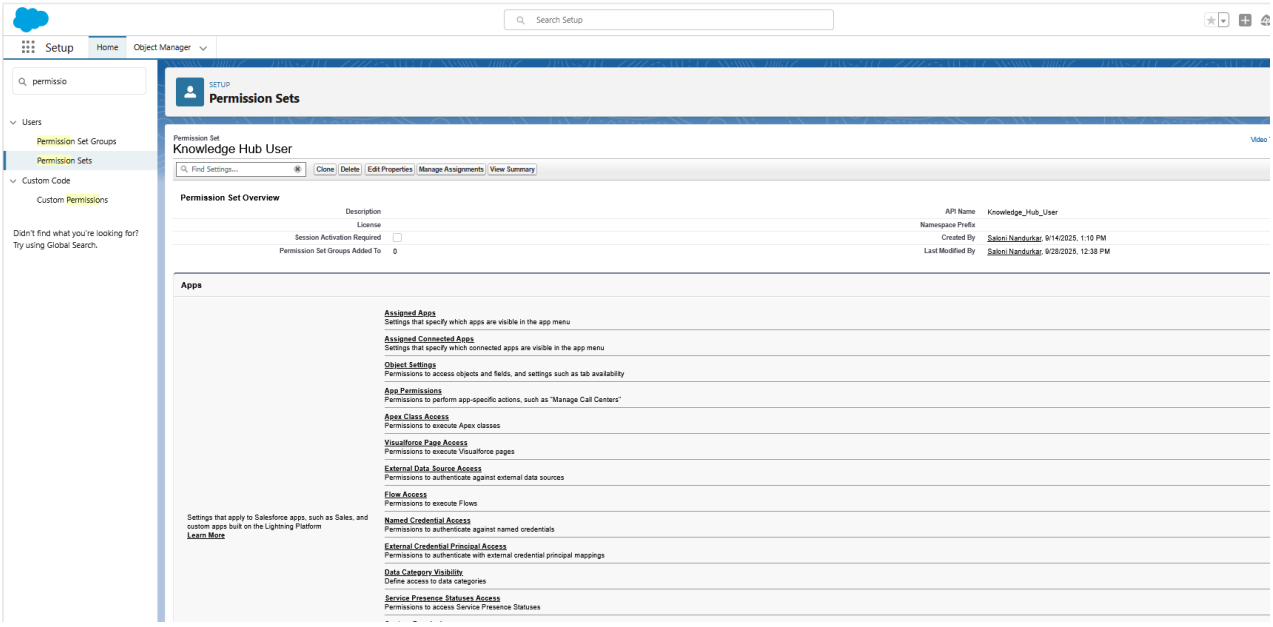
- **Object Settings** – Manage access to objects, fields, and tab visibility.
- **App Permissions** – Enable app-specific actions (e.g., Manage Call Centers).
- **Apex Class Access** – Grant execution rights to selected Apex classes.
- **Visualforce Page Access** – Allow execution of specific Visualforce pages.
- **External Data Source Access** – Authenticate against external data sources.
- **Flow Access** – Grant execution permissions for Flows.
- **Named Credential Access** – Access authentication for named credentials.
- **External Credential Principal Access** – Authenticate with external credential principal mappings.
- **Data Category Visibility** – Define visibility for knowledge data categories.
- **Service Presence Statuses Access** – Access service presence statuses.
- **Custom Permissions** – Access custom processes and applications.
- **Custom Metadata Types** – Read and manage custom metadata.
- **Custom Setting Definitions** – Access defined custom settings.
- **Organization-Wide Email Address Access** – Send emails using org-wide addresses.
- **Standard Invocable Action Type Access** – Use invocable actions across flows/processes.

System-Level Permissions

- **System Permissions** – Access to cross-app features (e.g., Modify All Data, API Access).
- **Service Providers** – Single Sign-On access to external websites.

Notes

- Permission set created for controlled access to Knowledge Hub objects and features.
- Ensures flexibility by assigning permissions without altering user profiles.



Custom Object Tab – Knowledge Articles

A custom tab was created for the *Knowledge Article* object to ensure it is accessible in the Lightning App navigation bar.

Custom Tab Details

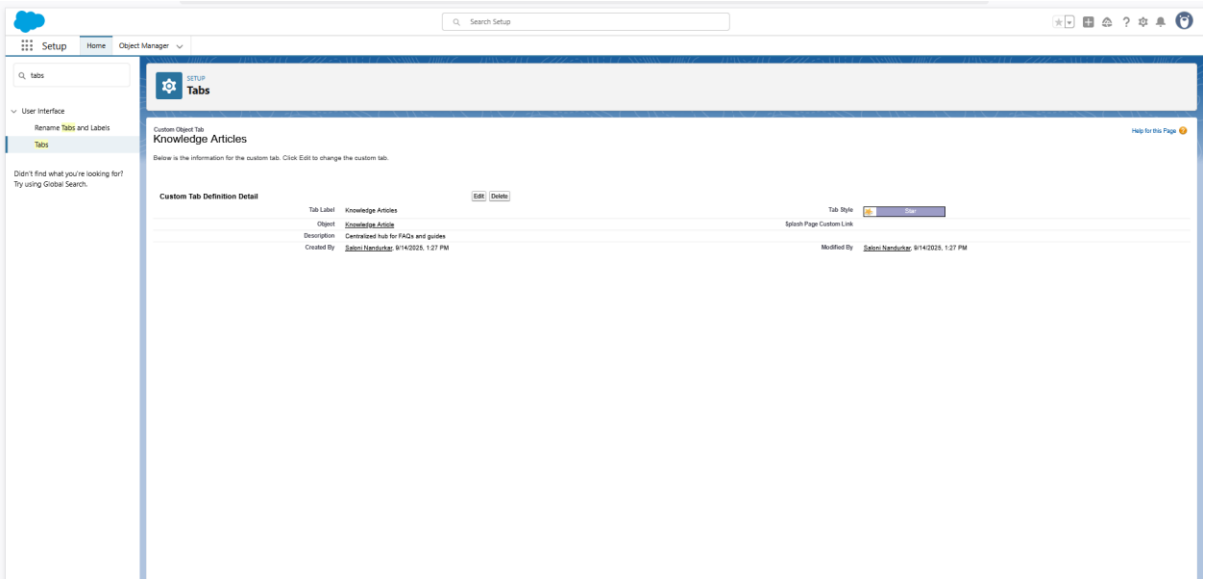
- **Tab Label:** Knowledge Articles
- **Object:** Knowledge Article
- **Tab Style:** Star
- **Splash Page Custom Link:** –
- **Description:** Centralized hub for FAQs and guides
- **Created By:** Saloni Nandurkar, 14 Sept 2025, 1:27 PM
- **Modified By:** Saloni Nandurkar, 14 Sept 2025, 1:27 PM

Configuration Steps

1. Navigate to **Setup → Tabs**.
2. Under **Custom Object Tabs**, click **New**.
3. Select **Object:** Knowledge Article.
4. Choose a **Tab Style** (Star).
5. Click **Next** → Set default tab visibility for profiles.
6. Click **Save**.

Outcome

- The **Knowledge Articles** tab now appears in the **Available Items** list when creating a Lightning App.
- This allows users to access and manage articles directly from the app navigation.



Lightning App – Knowledge Hub

A new Lightning App was created to provide streamlined access to the *Knowledge Hub* features.

Configuration Steps

1. Navigate to **Setup → App Manager**.
2. Click **New Lightning App**.
3. Choose **Standard Navigation** (or Console if required).

App Details

- **App Name:** Knowledge Hub
- **Description / Branding:** (Optional – can be added later)

Navigation Items

The following tabs were added to the app navigation (in recommended order):

1. Knowledge Articles (custom tab)
2. Reports
3. Dashboards
4. Chatter *(optional)*
5. Cases *(optional)*

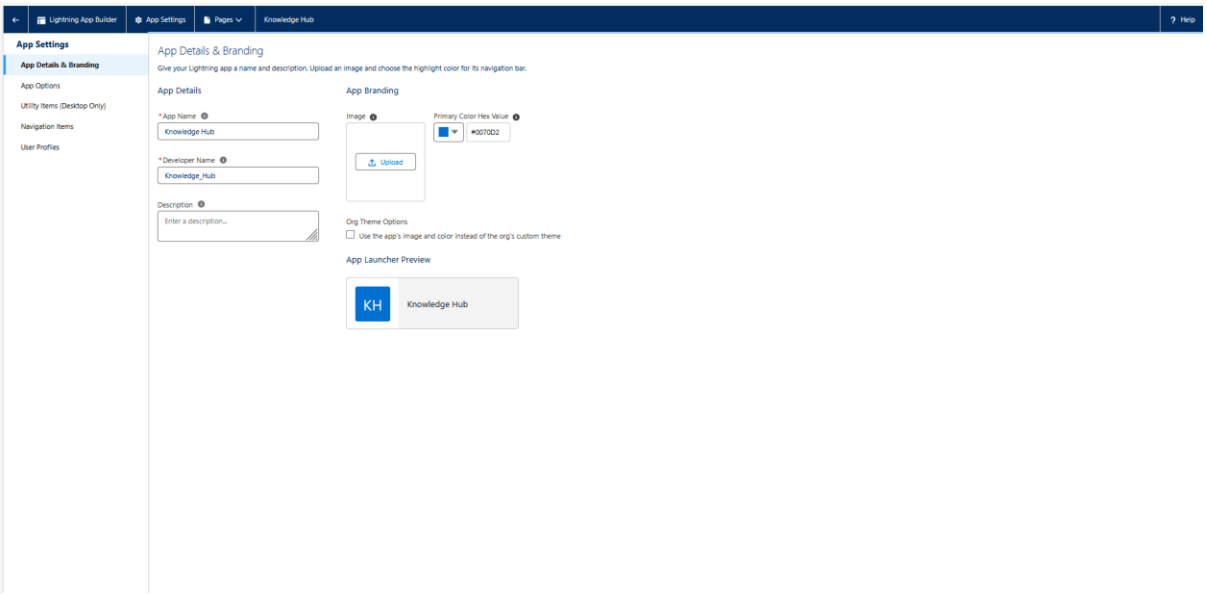
Additional Configuration

- **Utility Bar:** Not configured at this stage (can be added later).
- **Profile Assignments:** Assigned to *System Administrator* and test user profiles.

Outcome

- The **Knowledge Hub Lightning App** provides centralized access to articles, analytics, and collaboration tools.

- Ensures that users can easily navigate between Knowledge Articles, Reports, and Dashboards within a single workspace



- **Lightning App Page – Knowledge Hub Home**
- A custom Lightning App Page was created to serve as the main landing page for the *Knowledge Hub* app. This provides users with a centralized workspace to access articles, charts, and search functionality.
- **Configuration Steps**
- Navigate to **Setup → Lightning App Builder**.
- Click **New → App Page**.
- **Page Name:** Knowledge Hub Home.
- Choose layout: **1-column** or **2-column** (based on design preference).
- **Components Added**
- **Rich Text:** Placed at the top with instructions and logo.
- **List View / Related List – Single:** Displays a list of Knowledge Articles or recent items.
- **Report Chart:** Shows a chart of *Top Knowledge Articles* (using the report created earlier).
- **Custom LWC Placeholder:** Reserved for articleSearch Lightning Web Component.
- *(If unavailable, use Highlights Panel or Record List as a fallback).*
- **Activation**

- **Save → Activate**.
- Make available for: **Knowledge Hub** app.
- Set as **Default Home Page** for this app.
- **Outcome**
- Users accessing the *Knowledge Hub* app are directed to a **customized home page**.
- The page consolidates navigation, reports, and article listings, improving efficiency.
- Future extensibility supported via **Custom LWC (article search)**.
- 
Page Layouts & Compact Layout – Knowledge Article

Custom page layouts and compact layouts were configured to optimize how Knowledge Articles are displayed in Lightning Experience and mobile.

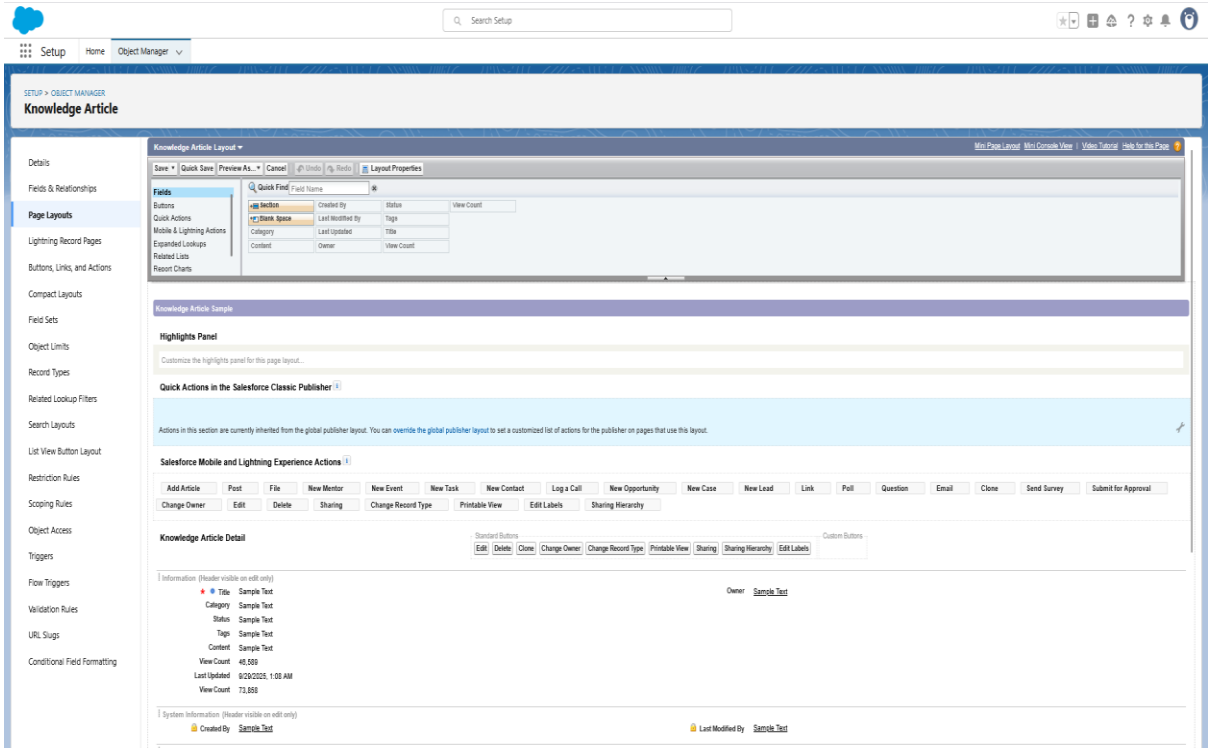
Page Layout Configuration

- Navigate to **Setup → Object Manager → Knowledge Article → Page Layouts → Edit Default Layout**.
- **Fields Added:**
  - Name (Title)
  - Status
  - Category

    - Tags
    - Content
    - View Count *(read-only)*
    - Last Updated *(read-only)*
    - Owner
- **Quick Actions Added:** New Article, Edit (placed in Mobile & Lightning Actions region).

Compact Layout

- Navigate to **Setup → Compact Layouts → New**.
- Fields displayed: Title, Category, Status, Last Updated.
- Set as **Primary Compact Layout**.

Outcome


- Users can view and edit Knowledge Articles efficiently in Lightning and mobile views.
- Key fields and actions are easily accessible, enhancing user productivity.
